EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Jeffrey Thurnau on 10-12-05.

The application has been amended as follows:

See the attached supplemental amendment from Applicant.

On page 1 line 9 of the specification, --now US Patent 6,793,599-- was inserted after "2002".

2. The following is an examiner's statement of reasons for allowance:

While it is well known per se to apply vacuum to evacuate gases in manufacturing molded articles such as exemplified in the teachings of Batchelar (US 4,209,483; new art), McClean (US 3,975,479; new art), Noto (US 5,925,297; art of record) and Fix (US 3,656,360; art of record), none of the prior art references obtained teaches (in the context of the recited claims taken as a whole) "*venting gases through the non-woven region during curing*" (emphasis added) in a process of manufacturing a belt. The above references only teach applying vacuum before or after curing operation. For this reason, the pending claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
